## Great Education, Great Time

The 2012 Onsite Training Events hosted by **Wieser Concrete** were completed on March 29th, 2012 with the last of five events hosted in Shell Lake, Wisconsin with 150+ guests attending.

Our 2012 training events were held at Portage, Wisconsin, Shell Lake, Wisconsin, Fond du Lac, Wisconsin, Maiden Rock, Wisconsin, and Arbor Vitae, Wisconsin with 800+ guests in attendance!

The events included large group and break-out sessions with plant tours at events held at our production facilities. The break-out sessions enabled guests to choose an opportunity to learn more about a topic of interest. During the plant tours, guests were able to see firsthand the steps involved in producing **Wieser's** pre-cast products.

**Wieser's** training events would not be complete without the signa-

Cylinder-Test Demonstration at Fond du Lac Seminar

ture meal prepared by our master chef, Andy Wieser. Pulled pork and turkey sandwiches have become the featured centerpiece of the event meal.

The team at **Wieser Concrete** thoroughly enjoys hosting these events. It is a great time to visit with our guests and learn how we can help them grow their business and what resources they need to be successful.

**Thank you** to all who participated in our 2012 Training Events! Your suggestions for our 2013 events are greatly appreciated!

## National Safety Recognition

ORLANDO, FL-March, 2012-**Wieser Concrete Products, Inc.** was recognized for their **Outstanding No-Loss Time Injury Safety Record** at the annual convention of the National Precast Concrete Association (NPCA) held March 1-3, 2012 in Orlando Florida.

Safety Manager, Andy Winkler, accepted NPCA's Safety Recognition Award on behalf of Wieser Concrete Products.

# Summer Comes Early!

**B**ased on the recent weather, it appears the Midwest has gone from Fall to Summer with a little Winter and Spring thrown in just for good measure!

With the unseasonably warm temperatures and the expanding daylight, nature has swung into high gear making a significantly "earlier-than-usual" haylage harvest a very real possibility.

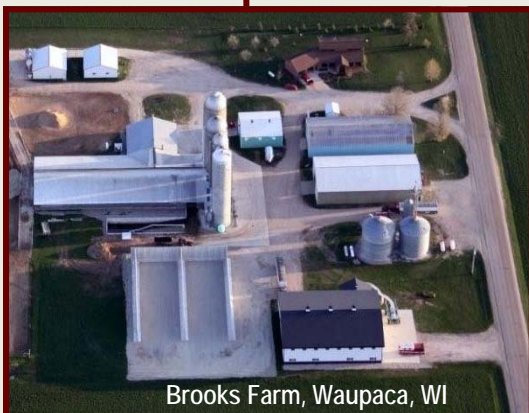

The most cost-effective and efficient storage option for haylage and all feedstuffs and commodities is a bunker silo storage system constructed with **Wieser Concrete Precast Bunker Silo Walls**.

**Wieser Concrete's Bunker Silo Walls** are available in 8'6", 10', 12' and 16' heights, making it easy to design a bunker silo storage system custom-fit to meet the necessities of your project.

Unlike cure-in-place, **Wieser Concrete** bunker silo walls allow for rapid installation and consistent quality without the time and weather concerns of cure-in-place projects.

**Wieser Concrete Products** can deliver and install bunker silo storage systems anywhere in the United States. Our on-hand inventory enables us to respond effectively to changing customer needs without compromising quality, efficiency or service.

As with all of our products, quality is assured due to our NPCA certified production process in a consistent production environment.

Brooks Farm, Waupaca, WI

Through our integrated systems, **Wieser** customer are assured of receiving the best value and service for their investment.

Call **Wieser Concrete** today to schedule delivery of your bunker silo storage system; the most versatile, reliable, and economical bunker storage option on the market today.

For more information about our Precast Bunker Silo Walls and all of our precast products, visit our website at [www.wieserconcrete.com](http://www.wieserconcrete.com).
