

PSX:SERIES SIX

A lower cost series of our original PSX, POSITIVE SEAL pipe to manhole flexible connector system. PSX:SERIES SIX is available for 8 through 18 inches to seal the most commonly used pipe types and sizes.

PSX:SERIES SIX Advantages:

- Lower Cost!
- Lower Freight!
- Same Basic, Time Proven, PSX Design Features!
- In Most Cases Fully Removable!
- Can Be Installed With The Same Equipment Used On Our Original PSX System!
- Compatible With Our Existing Formplugs And Unbrake Hole Formers!
- Compatible With Our Form & Flow Manhole Invert System!
- Meets And Or Exceeds Material Specifications of ASTM C-923

PSX is the designation for the POSITIVE SEAL GASKETING SYSTEM. This system uses three components to enable the manhole producer and installation contractor to provide a flexible, watertight connection where pipe enters manhole.

The three components as shown above are: POWER SLEEVE, GASKET, and TAKE-UP CLAMP. The POWER SLEEVE is mechanically expanded to compress the GASKET against recessed hole surface in the manhole wall. After adequate compression of the GASKET is achieved, the ends of the POWER SLEEVE interlock to return against any loss of compression. This secures PSX in the manhole wall ready to accept desired size and type of pipe.

When the contractor is ready to install the manhole, each personnel need only insert pipe through PSX and tighten TAKE-UP CLAMP to compress the GASKET against outside wall of pipe entering manhole.

NOTE: Press-Seal Gasket will continue to offer our current, full size, PSX, POSITIVE SEAL, gasketing system.

PSX:SERIES SIX

Introducing a NEW series of the PSX, POSITIVE SEAL, gasketing system that's worth MORE than it costs.

Reduced size of Gasket and Power Sleeve components means reduced costs while keeping the same basic, time proven, quality design features of the original PSX, POSITIVE SEAL gasketing system.
