

# WIESER CONCRETE

CONNECTIONS  
VOL.23 ISSUE 3 —  
MARCH 2025

In our ever-evolving world, one demand hasn't exactly changed, but it has certainly grown here at Wieser Concrete—not only in demand but also in size and capacity!

Founder Joe Wieser's first tank design, engineered alongside his father, serves as the foundation for what the Wieser's have since expanded into: a wide array of tank options to meet the many needs of our customers.

Wieser tanks can be used for various purposes, including fire protection, holding tanks, agricultural waste, septic systems, treatment system tanks, and more! Our tanks range in size from 320 gallons all the way up to 40,000 gallons!

Wieser Concrete offers everything from standard tanks and large tanks to extra heavy-duty tanks, treatment system tanks, and aerobic tanks. Consider how this versatile product could benefit you.

**Onsite Wastewater Training Seminars**

Wieser Concrete hosts nearly 600 wastewater professionals in Wisconsin across 4 locations in March.

The agendas for each day are filled with speakers, vendors and county officials for attendees to earn continuing education credits through DSPS and the DNR. Join us at one of the 2025 Septic Seminars. Registration is open now, visit [WieserConcrete.com](http://WieserConcrete.com) for more information.

Septic Seminar
