

# WIESER CONCRETE

## Featured Product: Salt & Sand Storage Solutions

**Built to Perform. Designed to Adapt.** When winter weather hits, reliable storage isn't optional, it's essential.

Wieser Concrete Products' Salt & Sand Storage Solutions provide a durable, flexible, and cost-effective way to protect materials and keep seasonal operations running smoothly.

Each panel is produced with a corrosion-inhibiting admixture to support long-term structural integrity. Our precast concrete wall systems are engineered for durability and rapid installation, making them a practical choice for municipalities, contractors, and commercial applications.

## Why Choose Wieser Concrete?

- **Precast Concrete Walls** – Strong, durable, and built to last
- **Economical Solution** – Reduced installation and long-term maintenance costs
- **Self-Supporting Design** – May not require traditional footings
- **Flexible Roof Options** – You choose the roof that fits your operation
- **Easy to Reconfigure** – Adapt or expand as your storage needs change
- **Custom Sizing** – Built to fit your exact material volume requirements

## Options... Unlimited!

From layout and size to roofing and future expansion, Wieser's salt and sand storage systems are designed around your needs, not a one-size-fits-all approach.

## A Look Inside Our Quarry: Powering Wieser Concrete from the Ground Up

Deep in the Maiden Rock valley sits one of the most important foundations of Wieser Concrete Products: our quarry. Owned and operated by Wieser since the 1970s, this site has played a critical role in supplying the raw materials that make our concrete products possible.

Recently, the quarry was the site of our latest blast - a carefully planned and executed operation that produced an estimated 45,000–50,000 tons of material. In the photo captured on blast day, each of the small peaks visible represents a 98-foot hole, all of which were drilled ahead of time and filled with explosive material the morning of the blast. While dramatic in appearance, the blast was the result of extensive preparation, coordination, and safety planning.

Wieser typically conducts a blast every couple of years. The timing is driven by production needs, as the crushed and screened rock from the quarry is used in our plants to manufacture all things concrete. This most recent blast marks the third blast at this site to supply material for upcoming projects currently in the pipeline.

Community safety and communication remain top priorities during any blasting activity. Ahead of each blast, the Wieser family makes a point to personally contact local neighbors to ensure they are informed and prepared. This long-standing practice reflects our commitment to being a responsible and respectful presence in the Maiden Rock valley.

Once blasting is complete, the real work begins. A specialized crushing and screening company comes on site and, when conditions allow, operates around the clock, 24 hours a day, seven days a week. They are currently entering their third week of crushing and screening, following a minor standoff with the frigid temperatures. They are processing material at an impressive rate of 200–300 tons per hour. From start to finish, each blast typically takes three to four weeks to fully process into usable material.

Beyond supporting our internal production needs, the Maiden Rock quarry also provides a wide range of materials available for customer purchase. Wieser trucks are capable of hauling 22 tons (approximately 16 yards) per load, and material can be spread at the customer's site when dump conditions allow. Proper clearance and adequate room are required to ensure safe delivery and placement. All materials listed below are available exclusively from our Maiden Rock location.

- Bank Fill Sand
- Erosion Control Rock (3"–6")
- Breaker Rock
- Crushed Road Gravel (1 1/4" & 3/4")
- Landscape Rock – River Rock (1 1/4")
- Mixed Rock and Sand
- Mound Sand
- Unwashed Lime Screenings
- Washed Lime Screenings
- Washed Rock (1 1/4", 3/4", & 3/8")
- Washed Sand

From the history of the quarry to the precision of the blast and the nonstop effort that follows, this operation is a powerful reminder of the work that happens long before concrete leaves our plants and enters job sites. It's not just rock, it's the backbone of Wieser Concrete Products, built on decades of experience, planning, and teamwork.

## MARK YOUR CALENDARS! WE WILL BE AT THE FOLLOWING EVENTS!

February 2-3

MOWA Annual Convention - Duluth, MN

February 4-6

NPCA Show The Precast Show - Kansas City, MO

WOWRA / WLWCA Joint Winter Conference - Wisconsin Dells, WI

February 10-12

MSTA Annual Conference - Mount Pleasant, MI

February 16-19

WWETT Show - Indianapolis, IN

February 19

SFB Chippewa Valley Ag Conference - Eau Claire, WI

Feb 17-18

MO Pork Expo - Osage Beach, MO

Feb 24-25

Central MN Farm Show - St. Cloud, MN

### EMPLOYEE ANNIVERSARIES

Bill T. - 5 years - Maiden Rock, WI

Michael M. - 14 years - Roxana, IL

Brad S. - 5 years - Portage, WI

Cindy P. - 3 years - Maiden Rock, WI

Austin W. - 11 years - Portage, WI

Steven K. - 14 years - Roxana, IL

Melanie A. - 1 year - Maiden Rock, WI

Ryan S. - 2 years - Maiden Rock, WI

Zachary H. - 4 years - Portage, WI

Drew W. - 1 year - Roxana, IL

**THANK YOU FOR ALL YOUR CONTINUED  
HARD WORK! YOU ARE APPRECIATED!**

### **\*IMPORTANT CONTINUED EDUCATION INFO.**

State is requiring all educators to reapply for credits.  
Once approval is granted, we will keep you all posted  
to what credits we are able to offer you.

**FEBRUARY 26<sup>TH</sup> - KELLY LAKE**

(KELLY LAKE HOLIDAY INN)

**MARCH 3<sup>RD</sup> - FOND DU LAC**

(WIESER CONCRETE - FOND DU LAC)

**MARCH 5<sup>TH</sup> - PORTAGE**

(WIESER CONCRETE - PORTAGE)

**MARCH 10<sup>TH</sup> - MAIDEN ROCK**

(WIESER CONCRETE - MAIDEN ROCK)

**MARCH 12<sup>TH</sup> - SPOONER**

(SPOONER CIVIC CENTER)
