

### Building barns before the snow flies

On a beef farm in Northwestern Iowa, Wieser Concrete crews were busy setting precast concrete posts, beams and slats for two Manure Pit Storage Barns, located in Orange City, IA.

Barn #1 dimensions are 109' x 326' and Barn #2 stands at 109' x 434'8". The precast concrete cattle slat openings allow for manure to collect in the pit below. The slats run the full length of both barn pits. Combined, the two barns will house approximately 2,700 head of cattle and will provide 7.2 million gallons of manure storage.

High back 44" feed bunks line both sides of the center drive-through lane to promote ease in feeding the cattle. The pre-stressed beams and top for the 12' drive-through lane will accommodate feeding equipment up to 48,000 pounds per axle.

## VISIT US AT THESE EVENTS:

Jan. 3-5 **Dakota Farm Show** — Vermillion, SD

Jan 10-11 **IOWWA** — Cedar Rapids, IA

Jan 16-17 **Missouri Smallflows** — Columbia, MO

Jan 16-18 **DBA-Dairy Strong** — Green Bay, WI

Jan 19-20 **Missouri Cattle** — Osage Beach, MO

Jan 22-24 **WI County Hwy** — Wisc. Dells, WI

Jan 24-26 **Sioux Falls Farm Show** — Sioux Falls, SD

Jan 25-27 **WWETT Show** — Indianapolis, IN

Jan 30 **IL Pork Expo** — Springfield, IL

Feb 1-2 **WOWRA/ WLWCA** — Wisc. Dells, WI

Feb 4-6 **MOWA** — Duluth, MN

## Onsite Wastewater Training Seminars

Every year, Wieser Concrete hosts hundreds of professionals in the wastewater industry for Wisconsin continuing education seminars. The dates in 2024 are Feb. 22 in Kelly Lake, Mar. 12 in Fond Du Lac, Mar. 14 in Portage, Mar. 19 in Maiden Rock and Mar 21 in Spooner.

The agenda each day is filled with speakers, vendors, county officials, and an opportunity to network with industry associates and regulatory professionals. See you in Feb. and Mar.
